Volume 71

Evaluation of the current state and perspective of wastewater treatment and reuse in Qatar Y. Manawi, A.K. Fard, M.A. Hussien, A. Benamor, V. Kochkodan (Qatar)	1
Saline brine desalination: application of sweeping gas membrane distillation (SGMD) L. Fatehi, A. Kargari, D. Bastani, M. Soleimani, M.M.A. Shirazi (Iran)	12
Development of a mathematical model for the prediction of concentration polarization in reverse osmosis desalination processes I.S. Al-Mutaz, F.M. Alsubaie (Saudi Arabia)	19
Evaluation of interactions among sewage sludge bioavailable metals from WWTPs using DTPA agent E. Giannakopoulos, I.K. Kalavrouziotis, H. Dimitrellos, P.H. Koukoulakis, S.P. Varnavas, F. Papadopoulos (Greece)	25
Theoretical and experimental studies of direct contact membrane distillation modules with inserting W-shaped carbon-fiber spacers Chii-Dong Ho, Luke Chen, Jing-Yuan Lai (Taiwan), Choon Aun Ng (Malaysia)	32
Foulant analysis of hollow fine fiber (HFF) membranes in Red Sea SWRO plants using membrane punch autopsy (MPA) T.N. Green, I. Al-Tisan, M. Rahman, Y. Al-Jehani, A.-M. Al-Hakamy (Saudi Arabia)	45
Single and binary adsorption of iron and manganese in synthetic water using activated pumice composites: effect of monovalent and divalent ions, desorption and reuse isotherms D.İ. Çifçi, S. Meriç (Turkey)	52
Optimal modification of poly(vinylidene fluoride) membrane surface by using surface-modifying macromolecules for application in membrane distillation R. Shoaie, J. Karimi-Sabet, S.M.A. Mousavian, P. Khadiv-Parsi, R. Moradi (Iran)	62
Effect of primary sludge to waste activated sludge mixing ratio on anaerobic digester performance A.M. Yeneneh, T.K. Sen, A. Kayaalp, Ha Ming Ang (Australia)	79
A new concept for cosmetic wastewater treatment by a suitable classification and separation system M.-L. Schirmer, A. Melzer, L. Ritzenhofen, M. Nagel, J. Tränckner (Germany)	85
Pretreatment of cosmetic wastewater by dissolved ozone flotation (DOF) P.R. Wiliński, P.P. Marcinowski, J. Naumczyk, J. Bogacki (Poland)	95
Continuous removal of toxic nickel from industrial wastewater by flotation-adsorption with multi-walled carbon nanotubes: kinetic and adsorption isotherms M.H. Dehghani, B. Karimi, A. Rafieepour (Iran)	107
Removal of some types of polyphenols and aromatic amines in textile industry wastewaters by nanocerium-dioxide-doped titanium dioxide D.T. Sponza, R. Oztekin (Turkey)	116
Removal of heavy metal ions from wastewater samples using electron beam radiation in the presence of TiO ₂ N. Dalali, M. Kazeraninejad, A. Akhavan (Iran)	136
Blackwater treatment via combination of sedimentation tank and hybrid wetlands for unrestricted reuse in Egypt H.I. Abdel-Shafy, M.A. El-Khateeb, M. Shehata (Egypt)	145
Treatment of ointment pharmaceutical wastewater by electrocoagulation process S. Khaldi, H. Lounici, M. Drouiche, N. Drouiche (Algeria)	152
Synergistic effect of activated carbon and ultrasonic irradiation on persulfate activation Ying Wang, Jiabin Chen, Tianyin Huang, Chengyao Wei (China)	159

Activated carbon from avocado seeds for the removal of phenolic compounds from aqueous solutions A.J.B. Leite (Brazil), C. Sophia A. (India), P.S. Thue, G.S. dos Reis, S.L.P. Dias, E.C. Lima, J.C.P. Vagheti, F.A. Pavan, W.S. de Alencar (Brazil)	168
Kinetics of divalent mercury reduction by zero-valent iron: the effects of pH, chloride, and dissolved organic carbon Go-Un Nam, Seunghee Han, Yongseok Hong (Korea)	182
Preparation of triethanolamine functionalized carbon nanotube for aqueous removal of Pb(II) Na Chen, Jie Teng, Fei-Peng Jiao, Xin-Yu Jiang, Xin Hao, Jin-Gang Yu (China)	191
Effect of KMnO_4 treating of granular activated carbon on the removal of natural organic matter D. Rathnayake, S.M. Korotta-Gamage, G. Kastl, A. Sathasivan (Australia)	201
Assessment of marine dredged materials taken from Turkey's ports/harbors in landscaping B. Güzel, H.M. Başar, K. Güneş, S. Yenisoay-Karakaş, D. Karakaş, L. Tolun (Turkey)	207
Preparation, characterization, equilibrium and kinetics studies of a molecularly imprinted polymer for selective recognition of dicamba from aqueous samples T. Beyki, M.J. Asadollahzadeh, M. Jahanshahi (Iran)	221
The treatability of landfill leachate by direct contact membrane distillation and factors influencing the efficiency of the process A. Zoungrana, İ. H. Zengin, H. Elcik, B. Özkaya, M. Çakmakci (Turkey)	233
The extent of change in the physicochemical characteristics and pollutants sequestration of date palm stones after microemulsion modification N.M.A. Al Lagtah (UAE and Singapore), M.N.M. Ahmad (Lebanon), A.B. Albadarin (Ireland and UK)	244
Toward energy efficient reverse osmosis polyamide thin film composite membrane based on diaminotoulene M. Said, S. Ebrahim, A. Gad, S. Kandil (Egypt)	261
Efficiency of zero valent iron in the modified Fenton process for the reduction of excess sludge and the key role of citric acid through deflocculation V. Amudha, J. Rajesh Banu (India), Ick Tae Yeom (Korea)	271
Preparation and properties of electric-sensitive poly(vinyl alcohol)/poly(acrylic acid) IPN hydrogels as draw agent for forward osmosis Hongtao Cui, Hanmin Zhang, Fenglin Yang (China)	280
Dynamic simulation of spherical particle settling in quiescent water S. Balasubramanian, K. Suresh, R. Karthikeyan (India)	289
High performance in power generation by pressure-retarded osmosis (PRO) from hyper-salinity gradient: case study of hypersaline Lake of Urmia, Iran H. Sharifan (USA), H.T. Madsen (Denmark), A. Morse (USA)	302
Nutrient uptake and fruit quality in a nectarine orchard irrigated with treated municipal wastewaters G.A. Vivaldi, A.M. Stellacci, C. Vitti, P. Rubino (Italy), F. Pedrero (Spain), S. Camposeo (Italy)	312
Production of physically and chemically modified biomass of corncob and its applications for the removal of Co(II) ion from its aqueous solution: optimum conditions determination R. Nadeem, M. Naeem, H. Zafar, R. Gill, G. Yasmean, Q.M. Khan (Pakistan)	321
Cadmium removal from aqueous solutions using <i>Moringa oleifera</i> seed pod as a biosorbent M. Khorsand, S. Dobaradaran, E. Kouhgard (Iran)	327
A kinetic study of heavy metals removal from contaminated marine sediment with chelating agents Chiu-Wen Chen, Te-San Chen, Yu-Chieh Lin, J.C.M. Kao, Cheng-Di Dong (Taiwan)	334
Adsorption of Ni(II) by a polyvinylidene fluoride-type chelating membrane bearing poly(aminophosphonic acid) groups Xiuli Wang, Laizhou Song, Feifei Yang, Dandan Yun, Jinbo Wang, Hongye Lu (China)	343
Synthesis and characterization of <i>N</i> -succinyl- <i>O</i> -carboxymethyl chitosan for Pb(II) ions adsorption Qingping Song, Chongxia Wang, Jiangang Gao, Yujie Ding (China)	359
Evaluation of soils for attenuation and retention of Zn (II) ions from aqueous solution H. Jalayeri, M.M. Salarirad, M. Ziaii (Iran)	369
Using Fe magnetic nanoparticles for reducing evaporation from water surface in small scale M.R.P. Omolbani, N. Zarindast, N. Mir, A.A. Dehghani (Iran)	380
Heterostructured Ti-doped ZnO/Ag metal: an efficient photocatalyst for dye degradation in sunlight S. Kanade, D.R. Shinde, K.G. Kanade (India)	388

Fast adsorptive removal of methylene blue dye from aqueous solution onto a wild carrot flower activated carbon: isotherms and kinetics studies M. Mahadeva Swamy, B.M. Nagabhushana, R. Hari Krishna, N. Kottam, R.S. Raveendra, P.A. Prashanth (India)	399
Photocatalytic degradation of Eriochrome Black-T by the Ni:TiO ₂ nanocomposites A. Kumar, G. Pandey (India)	406
Author Index	420
