Volume 74

Effects of interfacial polymerization conditions on performance of polyamide reverse osmosis membranes and optimization of polymerization conditions by statistical methodology
Hyung-Gyu Park, Yong-Doo Jung, Sung-Pyo Hong, Young-Nam Kwon (Korea) 1

Design of autonomous PV/RO desalination systems – case studies for Egypt and Greece
C. Perakis (Greece), E.T. El Shenawy, H.H. El Ghetany (Egypt), G. Kyriakarakos (Greece) 12

Emergy, energy and exergy analysis of a solar powered low temperature desalination system
V.G. Gude, A. Mummaneni, N. Nirmalakhandan (USA) 21

Numerical study of falling binary liquid film evaporation: liquid film thickness
A. Nasr (Tunisia and Saudi Arabia), A.S. Al-Ghamdi (Saudi Arabia), M. Feddaoui (Morocco),
M.S. Alsoufi (Saudi Arabia), S. Ben Nasrallah (Tunisia) 35

Structure and properties of membrane at different ages in drinking water treatment
L. Cui, Z. Feng, C. Goodwin, W. Gao, B.Q. Liao (Canada) 44

Current applications of electrocoagulation in water treatment: a review
Junfei Liu, Guocheng Zhu, Peng Wan, Zhongyi Ying, Bozhi Ren, Peng Zhang,
Zhenghua Wang (China) 53

New approach of the fouling process modeling in tangential filtration on cake
B.M. Harouna, O. Benkortbi, M. Hamadache, S. Hanini (Algeria), A. Amrane (France) 71

Fractionating natural organic matter and evaluating the fouling potentials of its components
Junxia Liu, Zhihong Wang, Huan He, Bingzhi Dong, Guicai Liu, Weiwei Huang,
Yao Yu, Mengliu Hu (China) 87

Effect of MPD concentration in the coagulation bath on the performance of CTA flat-sheet FO membrane fabricated by CTA-NMP-TMC casting solution
Xue-Jiao Guo, Ping-Yun Zhang, Xiang-Yu Chi, Zhen-Liang Xu, Yong-Di Liu (China) 96

Comparison of hybrid membrane systems in electroplating wastewater treatment
Jianyang Zhu, Qiang Jin, Aimin Li, Fuqiang Liu, Aidang Shan (China) 105

Field trial of water flow and ultrasonic irradiation to improve the water quality of a stagnant river reach
T. Andinet, Ilho Kim, Jai-Yeop Lee (Korea) 115

Assessment of water quality of man-made lakes in Klang Valley (Malaysia) using chemometrics: the impact of mining
I.B. Koki (Malaysia and Nigeria), K.H. Low, H. Juahir, A. Azid, S.M. Zain (Malaysia) 125

A new approach in simultaneous calibration of Hazen–Williams coefficients and demand of nodes in of water distribution systems
F. Sherri, A.H. Mahvi, A. Toloie Eshlaghy, A.H. Hassani (Iran) 137

Bioaccumulation and biosorption of some selected metals by bacteria *Pseudomonas putida* from single- and multi-component systems
I. Zinicovscaia, A. Safonov, V. Tregubova, V. Ilin, M.V. Frontasyeva, L. Demina (Russia) 149

Ozonation as an effective pretreatment for reducing antibiotic resistance selection potency in oxytetracycline production wastewater
Miaomiao Liu, Yu Zhang, Hong Zhang, Haifeng Zhang, Kuixiao Li, Zhe Tian, Min Yang (China) 155

N,N-diethylethanolammonium chloride-based DES-functionalized carbon nanotubes for arsenic removal from aqueous solution
M.K. AlOmar (Malaysia), M.A. Alsaadi (Malaysia and Oman), M.M. Aljumaily (Malaysia),
S. Akib (UK), T.M. Jassam, M.A. Hashim (Malaysia) 163

Valorization of fruit wastes (pistachio shells) as adsorbent for the removal of Zn from aqueous solutions under adverse acidic conditions
C.A. Aggelopoulos, E. Moschopoulou, P.G. Klepetsanis, C.D. Tsakiroglou (Greece) 174

New approach to Cu(II), Zn(II) and Ni(II) ions removal at high NaCl concentration on the modified chelating resin D. Kołodyńska, P. Rudnicki, Z. Hubicki (Poland)	184
Cadmium removal from simulated chloride wastewater using a novel flow-by fixed bed electrochemical reactor: Taguchi approach A.H. Sulaymon, S.A.M. Mohammed, A.H. Abbar (Iraq)	197
Mamey (<i>Mammea americana</i> L.) husks for the removal of Cr(VI) from aqueous media J. Serrano-Gómez, C.S. Beltrán Vargas, J. Bonifacio-Martínez, M.T. Olguín (Mexico)	207
Humic acid-carbon hybrid material as lead(II) ions adsorbent S.T. El-Wakeel, E.K. Radwan (Egypt), H.H. Abdel Ghafar (Egypt and Saudi Arabia), A.S. Moursy (Egypt)	216
A novel thiocarbonylhydrazide derivative for preconcentration of copper(II), nickel(II), lead(II), and cadmium(II) in water samples for flame atomic absorption spectrophotometry E. Çetinkaya, A. Aydin (Turkey)	224
Fabrication of functional macroscopic polymer microtubes from <i>N,N'</i> -methylene bisacrylamide crystals and their adsorption for Cr(VI) Yaqing Zhang, Botian Li, Liming Tang (China)	237
Novel synthesis of graphene oxide with polystyrene for the adsorption of toluene, ethylbenzene and xylenes from wastewater A. Azizi, A. Torabian, E. Moniri, A.H. Hassani, H.A. Panahi (Iran)	248
Identifying oxidation intermediates formed during ozone–UV of fulvic acid Xin Zhong, Chongwei Cui, Shuili Yu (China)	258
Removal of phenol from aqueous solution using persulfate activated with nanoscale zero-valent iron M.S. Tunç, O. Tepe (Turkey)	269
A comparative study of nitrate removal from aqueous solutions using zeolite, nZVI-zeolite, nZVI and iron powder adsorbents M. Moradi, O.B. Naeef, A. Azari, A. Mohseni Bandpei, A. Jonidi Jafari, A. Esrafil, R. Rezaei Kalantary (Iran)	278
The efficiency of catalytic ozonation using carbosieve in xylene removal from waste air stream S.A. Babaee, M.R. Samarghandi, M. Safdari, G. Asgari, F. Ghorbani, T. Jasemizad, E. Darvishi (Iran)	289
Removal of sulfide from aqueous solution with transition metals ion impregnated clinoptilolite: characteristics, equilibrium, kinetic and thermodynamic approach Sh. Karimi, A. Azadmehr (Iran)	296
Photocatalytic activity of nano-ZnO loaded with Ag and Fe immobilized on ZSM-5 Hang Xu, Dandan Zhang, Fengmin Wu (China)	308
Optimized routes for the preparation of gadolinium carbonate and oxide nano-particles and exploring their photocatalytic activity S.M. Pourmortazavi, M. Rahimi-Nasrabadi, M. Aghazadeh, M.R. Ganjali, M. Sadeghpour Karimi, P. Norouzi (Iran)	316
High surface area mesoporous activated carbon developed from coconut leaf by chemical activation with H ₃ PO ₄ for adsorption of methylene blue A.H. Jawad, R.A. Rashid, K. Ismail, S. Sabar (Malaysia)	326
Effective adsorption of methylene blue dye using activated carbon developed from the rosemary plant: isotherms and kinetic studies M.T. Amin, A.A. Alazba, M. Shafiq (Saudi Arabia)	336
Photocatalytic degradation of methylene blue dye by F-doped Co ₃ O ₄ nanowires T.R. Sobahi (Saudi Arabia), M.S. Amin, R.M. Mohamed (Saudi Arabia and Egypt)	346
Synthesis and photocatalytic application of nano La-Ce/TiO ₂ composite catalyst P. Sivakumar, D. Sudha, P. Mahalingam, A. Loganathan (India)	354
Biosorption of Turquoise Blue dye from aqueous solution by dried fungal biomass (<i>Trichoderma harzianum</i>) – kinetic, isotherm and thermodynamic studies V. Karthik, K. Saravanan, E. Nakkeeran, N. Selvaraju (India)	362
Improved photocatalytic removal of acid red 14 by amino-functionalized of F ₃ O ₄ -WO ₃ nanoparticles from aqueous solutions in the presence of UV irradiation A. Mohagheghian, K. Ayagh, K. Godini, M. Shirzad-Siboni (Iran)	371

Adsorption of Malachite Green on Fe-modified biochar: influencing factors and process optimization E. Kulaksiz, B. Gözmen, B. Kayan (Turkey), D. Kalderis (Greece)	383
Degradation of C.I. Acid Blue 25 in water using UV/K ₂ S ₂ O ₈ process: effect of salts and environmental matrix H. Ghodbane, O. Hamdaoui, S. Merouani (Algeria)	395
Synthesis and application of acrylamide/sodium vinylsulfonate/carboxymethyl cellulose/zeolite hybrid hydrogels as highly swollen effective adsorbents for model cationic dye removal E. Karadağ, B. Yel, S. Kundakçı, Ö. Barış Üzüm (Turkey)	402
Author Index	415
