Volume 81

An overview of the GCC Unified Water Strategy (2016-2035) W. Al-Zubari (Bahrain), A. Al-Turbak, W. Zahid, K. Al-Ruwis, A. Al-Tkhais, I. Al-Muataz, A. Abdelwahab (Saudi Arabia), A. Murad (UAE), M. Al-Harbi (Kuwait), Z. Al-Sulaymani (Oman)	1
Scale control in multistage flash (MSF) desalination plants – lessons learnt O.A. Hamed (Saudi Arabia)	19
Dimensional analysis and numerical simulation methods for the influence of impellers on the average velocity of flows in an oxidation ditch Yuling Liu, D. Li, W. Wei, B. Lv, J. Wei (China)	26
CFD simulation of a membrane bioreactor for high saline refinery wastewater treatment M. Maarefian, T. Miri, H. Sanaeepur, H. Rooeentan, S. Azami (Iran)	33
Enhancement of thickening and dewatering characteristics of sewage sludge using cement kiln dust A.M. Aboulfotouh, A.M. Dohdoh (Egypt)	40
Desalination of L-threonine (THR) fermentation broth by electrodialysis Jun Wu, Chuanqin Xu, Chuanyang Zhang, Guosheng Wang, Yizhang Yan, Cuiming Wu, Yonghui Wu (China)	47
Anaerobic fermentation of excess sludge at different pHs: characterize by acidogenesis capability and microbial communities structure shift Xiurong Zhu, Xuan Shi, Xianbao Wang, Xiaochang C. Wang, Pengkang Jin (China)	59
Influence of graphene oxide on the properties of composite polyacrylonitrile membranes B. Fryczkowska, D. Binias, Cz. Ślusarczyk, J. Fabia, J. Janicki (Poland)	67
Improvement in denitrification efficiency at low temperature with addition of redox mediators Hongying Yuan, Yeyi Sun, Jinxiu Sun, Xiaopei Wang, Jian Yuan (China)	80
Suspended solid and nitrate removal from aquaculture system wastewater by different approaches S. Bun, N. Chawaloeshphonsiya, T. Ermukdakul, W. Pungrasmi, B.B. Suwannasilp, P. Painmanakul (Thailand)	87
Modeling of meteorological data optimization to study hydrological behavior of watersheds: case study – MZAB basin, southeast of Algeria N. Oulad Naoui, E.A. Cherif, A. Djehiche (Algeria)	95
Immobilized <i>Chlorella vulgaris</i> for efficient palm oil mill effluent treatment and heavy metals removal A. Ahmad, A.H. Bhat, A. Buang (Malaysia)	105
Optimization of process parameters for Cr(VI) removal by seed powder of prickly pear (<i>Opuntia ficus indica</i> L.) fruits using Taguchi method S. Aziri, S. Meziane (Algeria)	118
Separation of nickel(II) ions from synthetic aqueous solutions with novel dimethylglyoxime-modified Amberlite IRA-420: kinetic and equilibrium studies Z.A. Khan (Saudi Arabia), A.E. M. Mekky, A.S. Bin Mahfouz, T.S. Saleh, M.S. Mohy Eldin (Saudi Arabia, Egypt)	123
Removal of lead ions from aqueous solutions by low-rank Pakistani coal T. Javed, N. Khalid, M.L. Mirza (Pakistan)	133
Preparation of chitosan-graft-benzo-15-crown-5 ether film for heavy metal ions separation Mingxia Wang, Feng Yan, Zhou Fang, Yuzhong Zhang (China)	143
Removal of fluoride from aqueous solution using Amberlite-IRA-aluminum sorbent nanoexchanger M.M. Emara, A.A. Salman (Egypt), N.M.R. Mahmoud (Egypt, Saudi Arabia), S.A. Fattah (Egypt)	152
Performance evaluation and kinetics study of <i>Paracoccus versutus</i> and <i>Shinella granuli</i> newly isolated from pyridine-degrading aerobic granules Wang Li, Jinyou Shen, Xiuyun Sun, Weiqing Han, Jiansheng Li, Lianjun Wang, Xiaodong Liu (China)	162

Comparative study on photocatalytic treatment of diclofenac: slurry vs. immobilized processes D. Juretic Perisic (Croatia), A. Belet (Croatia, France), H. Kusic (Croatia), U.L. Stangar, A. Loncaric Bozic (Slovenia)	170
Application of response surface methodology for the optimization of oxacillin degradation by subcritical water oxidation using H ₂ O ₂ : genotoxicity and antimicrobial activity analysis of treated samples E. Yabalak, S.K. Adigüzel, A.O. Adigüzel, R. Serap Ergene, M. Tunçer, A.M. Gizir (Turkey)	186
Evaluation of Fenton and photo-Fenton processes for the removal of <i>p</i> -chloronitrobenzene in aqueous environment using Box-Behnken design method M. Mohadesi, A. Shokri (Iran)	199
Single-step solvothermal synthesis of boron-doped Bi ₂ WO ₆ visible-light-induced photocatalyst and determinations of surface characteristics and photocatalytic activities Chao-Yin Kuo, Chung-Hsin Wu, Ming-Ju Hsu (Taiwan)	209
Adsorption of humic acid from aqueous solution onto chitosan-coated attapulgite composites Feng Liang, Yuehua Deng, Benzhi Liu (China)	216
Solar photocatalytic oxidation of an azo dye with immobilised TiO ₂ /S ₂ O ₈ ²⁻ in a component parabolic collector-reactor L. Ghalamchi, M.H. Rasoulifard, M.S.S. Dorraji, R. Pourata (Iran)	223
Biodegradability enhancement of azo dye Direct Orange-26 using UV/Fenton-like process: optimization using response surface methodology Z. Parsa, M. Motevassel, M.R. Khosravi-Nikou, S. Jorfi, B. Ghasemi (Iran)	233
Response surface methodology mediated optimization of textile azo dye, Eriochrome Black T decolorization by <i>Bacillus cereus</i> RC1 R. Uppala, K. Sundar, A. Muthukumaran (India)	242
Removal of methylene blue from water using eggshell membrane fixed bed R. Zerdoum, Z. Hattab, Y. Berredjem, R. Mazouz, R. Djellabi, N. Filali, A. Ghei, K. Guerfi (Algeria)	252
Removal of textile dyes from aqueous solutions by lignin and its derivative charcoals: characterization, adsorption kinetics and isotherms M. El Marouani, L. El Fakir, S. Men La Yakhaf, N. El Hrech, A. Dahchour, S. Sebbahi, S. El Hajjaji, F. Kifani-Sahban (Morocco)	265
Biosorptive removal of basic dye methylene blue using raw and CaCl ₂ treated biomass of green microalga <i>Scenedesmus obliquus</i> H.H. Abdel Ghafar, M.A. Embaby (Saudi Arabia, Egypt), E.K. Radwan, A.M. Abdel-Aty (Egypt)	274
Preparation of TiO ₂ -based photocatalysts and their photocatalytic degradation properties for methylene blue, rhodamine B and methyl orange Jin-Gang Yu, Jiao Zou, Liang-Liang Liu, Xin-Yu Jiang, Fei-Peng Jiao, Xiao-Qing Chen (China)	282
Congo red adsorption on shell powder and chitosan-coated shell powder biosorbents: experiments and theoretical calculation Liu-Qin Ge, You-Zhou Zhou, Neng Fan, Mei-Sheng Xia, Ling-Qing Dai, Ying Ye (China)	291
Decolorization mechanisms of an anionic dye by using zero-valent iron nanoparticles: application of response surface modeling for the optimization process U.B. Simsek, M. Turabik (Turkey)	303
Activated carbon produced from sugarcane bagasse waste as a low-cost dye-containing wastewater adsorbent for reactive turquoise blue removal Siyu Li, Lina Wang, Xiuqin Yang, Yanwei Wang (China)	315
O ₃ /UV photo-oxidation process for the removal of reactive yellow 3 dye from wastewater K. Rajabi Zadeh, M. Malakootian (Iran)	322
Author Index	327
