|--|-----|
| Double-acting batch-RO system for desalination of brackish water with high efficiency and high recovery P.A. Davies, A. Afifi, F. Khatoon, G. Kuldip, S. Javed (UK), S.J. Khan (Pakistan) | 1 |
| Optimization modelling for the use of antiscalants in the brackish RO desalination plants A.S. Gharbia (Hungary), S.S. Gharbia (Ireland) H. Tamous, T. Abushbak (Palestinian Authority), B. Zákányi, M. Tóth (Hungary) | 12 |
| Reverse osmosis fouling mitigation using variable square waves by controlling reject and feed flows based on a distributed control system M. Ghassoul (Bahrain) | 21 |
| Design optimization of the parallel-feeding multi-effect evaporation system using multi-objective genetic algorithm Cong Liu, Mingshu Bi, Guangrui Cui (China) | 33 |
| Design modifications of inclined-type single slope solar still with collecting element and sun-tracking mechanism S. Abdallah, R. Abu-Malouh (Jordan) | 47 |
| Comparative study of a conventional solar still with different basin materials using exergy analysis M.E.H. Attia (Algeria), A. Muthu Manokar (India), A.E. Kabeel (Egypt), Z. Driss (Tunisia), R. Sathyamurthy (India), W. Al-Kouz (Saudi Arabia) | 55 |
| Municipal wastewater reclamation and reuse using membrane-based technologies: a review Jing Wu, Yuanyuan Zhang, Juan Wang, Xiong Zheng, Yinguang Chen (China) | 65 |
| Improving drinking water reliability from water purification facilities through appropriate technology, in the case of Bind Dinh, Vietnam Jonglip Kim, Younghwan Moon, Jeyong Yoon, Junseok Hwang (Korea) | 83 |
| Preparation and anti-fouling performance of polyvinylidene fluoride composite membranes modified with different contents of TiO ₂ /GO Huiya Wang, Keqiang Ding, Qiang Zhou (China) | 95 |
| An experimental and computational investigation of poly(piperizinamide) thin film composite membrane for salts separation from water using artificial neural network R. Mahadeva, R. Mehta, G. Manik, A. Bhattacharya (India) | 106 |
| O-MWCNT/PAN/PVDF ultrafiltration membranes with boosted properties for oil and water separation T.F. Ajibade (China, Nigeria), Jiaoxing Xu, Huali Tian, Lunhui Guan, Kaisong Zhang (China) | 122 |
| Mitigation cost of desalination intake impact on coastal wetlands R. Navarro, J.L. Sánchez Lizaso (Spain) | 136 |
| Development of microbial biofilms on cellulosic fibres for organic matter removal in river water treatment Wen-Pei Low, M.F.M. Din, Fung-Lung Chang (Malaysia), S.N.F.B. Moideen (Japan), Yee Yong Lee, S. Krishnan (Malaysia) | 144 |
| Effect of phosphorus removing agents on sludge activity and floc structure in saline wastewater treatment Weiping Sima, Jianwei Dong, Qiang He, Hengjun Tang, Jian Tang (China) | 154 |
| A pilot study for rapid water clarification by V-shaped nested tubes L. Keshtgar, A. Rostami, S. Ataollahi, A.A. Azimi, M. Dehghani, E. Pirzadeh (Iran) | 160 |
| Magnetic nanoadsorbents derived from magnetite and graphene oxide for simultaneous adsorption of nickel ion, methylparaben, and reactive black 5 Hua-Wei Chen, Chyow-San Chiou, Yo-Ping Wu, Chun-Hao Chang, Yi-Hung Lai (Taiwan) | 168 |
| Desorption and recovery of fluoride adsorbed by the aluminum-loaded chelating resin Ke Jiang, Xiangnong Zeng (China) | 178 |
| Removal of naphthalene from aqueous solutions by phosphorus doped-titanium dioxide coated on silica phosphoric acid under visible light B. Banaei, A.H. Hassani, F. Tirgir, A. Fadaei, S.M. Borghaei (Iran) | 187 |

| | |
|---|-----|
| Nitrate removal from water by using <i>Cyperus alternifolius</i> plants in surface flow constructed wetlands R. Nazarpour, M. Farasati, H. Fathaabadi, M. Gholizadeh (Iran) | 197 |
| Could the optimization of electrocoagulation simply be based on the maximization of flocs yield? Qiuling Xu, Jun Lu, I.D. Teglada, Kai Xu, Xiao Leng, Hongliang Dai (China) | 206 |
| Treatment of organophosphated flame retardants from waters by hydroxyl radical producing processes and toxicity investigation F. Karaer Özmen (Turkey) | 216 |
| Photocatalytic ozonation of municipal wastewater for degradation of phenol using Fe doped TiO ₂ nanoparticles: optimization using RSM C.V. Rekhate, J.K. Srivastava (India) | 228 |
| Carboxylate modification of sugarcane bagasse for effectively Cd(II) removal from aqueous solutions: a low-cost renewable and environment-friendly agricultural waste-based adsorbent Jinzheng Ma, Ping Li, Su-nv Wang, Xiangyu Zheng, Jinhua Wu (China) | 243 |
| Experimental studies on the removal of heavy metal ion concentration using sugarcane bagasse in batch adsorption process V. Yogeshwaran, A.K. Priya (India) | 256 |
| Adsorption of manganese ions from aqueous solution by using manganese oxide coated zeolite Md.W. Rahman (Bangladesh), Huei Ruey Ong, Wendy Yin Jou Kong, H. Abdullah, M.M.R. Khan (Malaysia) | 273 |
| Adsorption characteristics of Cu ²⁺ by amphoteric and nanometer zero-valent iron modified bank soil from Jialing River (Sichuan section) Hai-xia He, Hong-yan Deng, Wen-bin Li, Yun-wen Liao, Lei Hou (China) | 282 |
| Selective separation of cadmium(II), copper(II) and nickel(II) ions from electroplating wastewater using dual flat sheet supported liquid membrane Lai Yee Lee, N. Morad, N. Ismail, M. Rafatullah (Malaysia) | 291 |
| Lead sorption by Togo rock phosphate as a sustainable solution to metal water depollution K.A. Degbe, D.D. Bafai, M. Koriko, S. Tchegueni (Togo), C. Lhoussaine, M. El Meray, M. Hafidi (Morocco), G. Tchangbedji (Togo) | 302 |
| Mechanisms and model study of Zn(II) and Cd(II) competitive adsorption on V, Ti-bearing magnetite-humic acid adsorbent Manman Lu, Yuanbo Zhang, Zijian Su, Shuo Liu, Jicheng Liu, Tao Jiang (China) | 308 |
| Photocatalytic removal of endocrine disrupting compounds from aqueous solution by different size nano-TiO ₂ under artificial UVA E. Basturk, M. Karatas (Turkey) | 322 |
| Potentially poisonous elements removal from vehicle-wash wastewater and aqueous solutions using composite adsorbents M. Ilyas, W. Ahmad, H. Khan, S. Yousaf (Pakistan) | 331 |
| Optimization using response surface methodology for the sorptive removal of crude oil spills using a low-cost chitosan-poly (butyl acrylate) grafted copolymer R.E. Khalifa, A.A.E.-W. Ali, G. Abo-Zaid, A.M. Omer, T.M. Tamer, Y. Ammar, M.S.M. Eldin (Egypt) | 343 |
| A comparative study: biological and chemical synthesis of iron oxide nanoparticles and their affinity towards adsorption of methylene blue dye D.M. Hammad, A.A. Asaad (Egypt) | 354 |
| Utilization of low-cost bio-waste adsorbent for methylene blue dye removal from aqueous solutions and optimization of process variables by response surface methodology approach P. Yilmaz, D. Gunduz, B. Ozbek (Turkey) | 367 |
| Usage of titanium nanomaterial for the decolorization of methylene blue and reactive red 198 dyes by sonocatalysis E. Baştürk, M. Işık, M. Karataş (Turkey) | 389 |
| Adsorption of Crystal Violet dye from synthetic textile effluents by utilizing wheat bran (<i>Triticum aestivum</i>) H.A. Haq, T. Javed, M.A. Abid, S. Zafar, M.I. Din (Pakistan) | 395 |
| Zeolite imidazolate framework-11 for efficient removal of Bromocresol Green in aqueous solution, isotherm kinetics, and thermodynamic studies R. Lamari, B. Benotmane, S. Mezali (Algeria) | 407 |

| | |
|---|-----|
| Adsorptive removal of the azo dye Direct Blue 2 onto agriculture waste corncob L.M. Gómez, A. Hormaza (Colombia) | 421 |
| Exploring the usability of <i>Cedrus deodara</i> sawdust for decontamination of wastewater containing crystal violet dye M. Batool, T. Javed, M. Wasim, S. Zafar, M.I. Din (Pakistan) | 433 |
| Author Index | 449 |
