

Contents
Volume 316

Spatial distribution of nitrate and fluoride pollution and risk assessment in drinking water resources of Chennai, Kancheepuram, and Tiruvallur Districts of Tamil Nadu, India
B. Muththamizh, A. Sowmya, S. Prabhakar, P. Muthamilselvi, A. Kapoor, M. Rajesh (India) 1

Contribution to the study of seawater desalination effluents: chemical and toxicological analysis of a discharge after using a mixing basin (Martinique)
L. Sylvius, F. Ferrer, C. Lemus, J. Smith Ravin, S. Morin (France) 22

Preparation of MnS-FeOCl composite and its Fenton-like reaction performance under different pH
Yaoji Chen, Guoping Zhao, Yuan Shi, Ziyi Zhang, Jie Wang, Shaoping Tong (China) 34

Toward sustainable environmental cleanup: metal-organic frameworks in adsorption – a review
B.R. Alsehli (Saudi Arabia) 44

Improved bisphenol A degradation under visible-light irradiation through a Bi₂Ti₂O₇/g-C₃N₄ binary Z-scheme heterojunction
Dapeng Zhang, Xiaowei Xu, Zehua Zhao, Huihui Chen, Haifeng Tu, Jun Zhang, Cheng Zhang, Chaoyue Wu, Shanshan Su, Yang Lv, Jie Cao, Linli Liu, Yi Wang, Xiaochen Lin (China) 71

Effect of forward osmosis membrane process on biogas slurry concentration
Ping Xiao, Liang Liu (China) 82

Experimental and computational study on the anti-re-entrainment performance of an innovative demister with embedded drainage channels
Shi Bu, Yong Jia, Quan Yang, Zhengjun Yang, Meilian Yang (China) 91

Study on visible photocatalytic activity of an oxalate-extended Co(II) coordination polymer
Jia-Jia Zhang, Jian-Hui Liu, Yu-Chang Wang, Wen-Fu Yan, Yuan-Peng Wang, Yu Han, Jia-Tong Qu, Juan Jin, Yong-Feng Liu, Jun-Shen Liu (China) 111

Development of characteristics of laterite soil-based mixtures for the removal of nitrate from drinking water
P.G.H. Pupulewatte, N.U.S. Dissanayake, D.T. Jayawardana, B.M. Gunathilake, A.V.P.S. Buddhima (Sri Lanka) 121

Comparative performance evaluation of two compression ways of a single-effect mechanical vapor compression desalination system
Cong Liu, Lin Xu, Yumeng Wang (China) 136

Pilot-scale sulfur autotrophic denitrification biofilter in denitrification of pig farm wastewater biological tail water
Qing Zhang (China) 151

Comparison studies on treatment of automobile wash wastewater by filtration techniques using alum sugarcane bagasse and wood dust
A. Latha, R. Ganesan, G. Venkatesan, B. Krishnakumari (India) 160

Photo-irradiation synthesis of Fe₃O₄ and GO/Fe₃O₄ magnetic nanoparticles for tartrazine adsorption: a comparative and reuse studies
R.F. Abbas, M.J.M. Hassan, A.M. Rheima (Iraq) 168

Adsorptive removal of methyl orange from aqueous solution by hydrotalcite derived catalysts
N. Aider, B. Djebbari, F. Touahra, D. Halliche (Algeria) 185

Effects of Na/Ti ratio on the properties of sodium titanate for photocatalytic degradation of ofloxacin
Shengwei Chen, Wenjie Zhang, Chang Ye (China) 198

Comparison of reverse osmosis and electrodialysis in brassware effluents treatment
S. Benalla, M. Zait, F.Z. Addar, S. Kitanou, M. Tahaikt, A. Elmidaoui, M. Taky (Morocco) 205

Performance analysis of pulsed direct current electrocoagulation for chemical oxygen demand removal from wastewater: energy savings and cost minimization
K. Karthikeyan, T. Mothilal, V. Vandhana Devi (India) 214

Assessing the effectiveness of rainwater harvesting structures in an urban environment A. Jebamalar, R. Sudharsanan, G. Ravikumar, M. Sasikumar (India)	224
Analysis of the rational allocation of regional reclaimed water based on the system coupling coordination criterion Yanming Li, Hongyuan Fang, Jinfu Hou, Qianqian Cheng (China)	237
Improvement of a novel polymeric membrane performance by adding alumina powder for seawater desalination H. Ajari, K. Hidouri, H. Akrouf, F. Khaled, B.A.B. Chaouachi (Tunisia), Q. Alsahy (Iraq)	250
Fouling on aluminum-brass and titanium tube surface in environment of low-temperature multi-effect distillation for desalination Shuhua Zhou, Tao Lu, Bing Ni, Shengqiang Shen, Xue Chen (China)	258
Separation of copper(II) ions using sulfonated poly (glycidyl methacrylate) grafted cellulose films: kinetic, isotherm, and thermodynamic studies M.A. Abu-Saied, E.A. Soliman, E.A. Hassan, M.S. Mohy-Eldin (Egypt)	267
Fabrication of 3-diethylaminopropylamine modified bamboo fiber prepared by radiation technique and its efficient and recycle adsorption for Methyl orange Houhua Xiong, Zhengkui Zeng, Jifu Du, Long Zhao (China)	281
Applications of the synthesized iron nanoparticles in the degradation of p-nitrophenol Zeyan Wu, Quanju Yang, Minghua Li, Ye Zhang, Kezhen Qi (China)	290
Adsorption efficiency of electrospun polyacrylonitrile nanofibers modified with ethylenediamine for nitrate removal Choon-Ki Na, Gayeon Park, Han Yong Kim, Hyunju Park (Korea)	299
Enhanced adsorption of quinoline from aqueous solution by NaOH-treated biochar derived from orange peel: preparation, performance, mechanism, and density functional theory study Yiwei Cao, Dongyan Xu (China)	306
Preparation of Pb/biochar composite as particle electrode for three-dimensional electrochemical oxidation of chemical oxygen demand from chemical wastewater Mingyue Piao, Jing Zhang, Huishi Du, Hongxue Du, Honghui Teng (China)	317
Polycationic liquid modified functional membrane showing good separation performance in dye wastewater treatment Minyan Wu, Zirui Wang, Shumeng Liu, Qing Zhang, Xiaoji Zhou, Shusu Shen (China)	327
Oil removal from water using agricultural wastes-based adsorbents for the application in reverse osmosis desalination systems N. Wagih, M.M. Mahmoud, A.A. Elbaz, D. EL-Moniry (Egypt)	335
Preparation and characterization of visible-light driven La/Mg co-doped ZnO photocatalyst A. Phuruangrat, T. Thongtem, S. Thongtem (Thailand)	356
Enhancing energy and exergy efficiency of pyramid solar still through nanoparticle integration: a comparative analysis M.Y.A.-A. Allah (Saudi Arabia)	363
Experimental study of chemical oxygen demand removal by electrochemical oxidation treatment of petroleum refinery wastewater by using response surface methodology M.A. Hussein, H.A. Shamkhi, Z.N. Abd, F.H. Abbas (Iraq)	371
Adsorption properties for ammonia nitrogen by polyacrylic acid/sodium alginate-based titanium dioxide composite hydrogel Chang-Zi Guo, Yi Han, Wan-Qin Zhao, Xu-Li Zhang (China)	383
Nickel (II) adsorption in aqueous solutions with cost-effective mesoporous <i>Bitlis pumice</i> stone S. Yamaç, S.M. Turp, H. Çoban (Turkey)	395
Applicability assessment of LECA and a-Fe ₂ O ₃ @LECA for removing nitrate from drinking water Z. Vesali, M. Zare, S. Sabbaghi (Iran)	408
Predictive model based on artificial neural network for estimating the adsorption of nickel and lead on a natural and synthetic support H. Bouarar, M. Bouhedda, H. Cherifi (Algeria)	419
Removal of chemical oxygen demand from slaughterhouse wastewater by electrocoagulation in continuous mode: Isothermal, kinetic and adsorption study S.A. Tuesta-Tinoco, P.L. Alcántara-Romero, R.A. Yuli-Posadas, M.E. King-Santos, W.F. Zaldivar-Alvarez, A. La Rosa-Toro, W. Reátegui-Romero (Peru)	431

Fabrication of stable and monodispersed magnesium oxide nanoparticles and their reduction potentials M.I. Din, R. Khalid, Z. Hussain, R.N. Afzal, S. Ahmad (Pakistan), S.A. Khan, M. Younas (Saudi Arabia)	445
Nitrate removal by nanofiltration and reverse osmosis: comparison and modeling H. Zeggar, F.Z. Addar, S. El-Ghizel, S. Kitanou, M. Tahaikt, M. Taky, A. Elmidaoui (Morocco)	452
Development of heterogenous capillary membranes with programmable properties made of PEBA copolymer for CO ₂ removal and testing their properties D. Polak, M. Szwast (Poland)	464
The first comparison of the effectiveness of phosphonium ionic liquids in classical solvent extraction and in polymer inclusion membranes for Hg(II) removal K. Witt, M.A. Kaczorowska, D. Bożejewicz, W. Urbaniak (Poland)	472
Influence of the type of polymer and plasticizer on the properties and efficiency of membranes containing acetylacetone carrier for the removal of Cd(II) ions from aqueous solutions D. Bożejewicz, K. Witt, M.A. Kaczorowska (Poland)	483
Treatment of surface water contaminated with ketoprofen: submerged photocatalytic membrane reactor vs. membrane distillation unit S. Mozia, R. Rajakumaran, K. Szymański, J. Grzechulska-Damszel (Poland)	493
Application of a deep eutectic mixture and ionic liquid as carriers in polymer adsorptive membranes for removal of copper(II) and zinc(II) ions from computer scrap leachates M.A. Kaczorowska, D. Bożejewicz, K. Witt (Poland)	505
Swelling and plasticization of the polymer membrane under the influence of contaminants containing hydrogen sulfide G. Wiciak, K. Janusz-Szymańska, A. Janusz-Cygan, A. Pawlaczyk-Kurek (Poland)	514
Analysis of the process of pharmaceutical substances removal from aquatic solution using membranes modified with calcium carbonate I. Zielińska, D. Polak, H. Nurczyńska, M. Szwast, P. Gierycz (Poland)	520
The separation of mineral salt from a dye-salt aqueous mixture by electro dialysis A.E. Ahmed, K. Majewska-Nowak, M. Ahmed, M. Grzegorzek (Poland)	532
Integrated removal of selected hard-to-degrade pollutants on the example of petroleum compounds J. Piekutin, U. Kotowska, M. Puchlik (Poland), O. Voloshkina (Ukraine)	542
Removal of selected carbamate pesticides (prosulfocarb) from aqueous solutions using sorption on WG-12 activated carbon K. Ignatowicz, J. Piekarski, B. Dąbrowski (Poland)	548
Remediation of nano- and microplastics in water environment using nanomaterials M. Bodzek (Poland)	557
Research on structural and process properties of polysulfone membranes modified by CuO M. Szwast, D. Polak (Poland), I. Perelshtein, A. Gedanken (Israel), A. Krasinski, M. Stor, W. Piątkiewicz, W. Fabianowski (Poland)	574
Granulometric analysis of TiO ₂ particles in the aspect of membrane filtration M. Rajca, R.T. Bray, A. Sokołowska (Poland)	583
Research on the possibility of heavy metals separation from metallurgical wastes using an EDTA extraction and nanofiltration process M. Nocoń, I. Korus (Poland)	589
The impact of lubricants used in the rubber industry on the quality of generated wastewater. Recycling of lubricants in the production process S. Kempa, M. Rajca (Poland)	600
Desalination of sea and geothermal water on commercial membranes using pervaporation I. Gortat, J. Marszałek (Poland), B.N.V. Hari (India, Poland), M. Brzeziński, P. Wawrzyniak (Poland)	605
Integrated membrane techniques nanofiltration/pervaporation for desalination of textile wastewater J. Marszałek, N. Misztela, R. Żyła (Poland)	616
Desalination processes supported by renewable energy sources managed by artificial intelligence M. Kaczmarczyk, B. Tomaszewska (Poland)	627
Complementarity of renewable energy generation and its storage in desalination processes M. Kaczmarczyk, M. Bodzek, B. Tomaszewska (Poland)	636
Organic matter in miocene water: occurrence and removal. Case study I. Zimoch, A. Górską, Ł. Weber (Poland)	647

Microbiological safety of water in the risk management of operating water supply systems – a case study of Silesia, Poland I. Zimoch, Ł. Czopik (Poland)	656
Water intake efficiency analysis in risk management of water supply systems – a case study of Głubczyce collective water supply system, Poland I. Zimoch, M. Grabuńczyk (Poland)	669
Analysis of the limits in the application of membrane technologies in Polish water supply systems using the reverse osmosis process as an example I. Zimoch, A. Koszyka (Poland)	682
Enhancing duckweed cultivation for sustainable energy and wastewater management in wastewater treatment plant J. Hermaszewski, E. Łobos-Moysa, I. Zimoch, J. Kalka, B. Kaźmierczak, E. den Boer (Poland)	692
Evaluating the impact of water resource fee-to-tax reform pilot on total factor water utilization efficiency: empirical evidence from Hebei Province, China Duyun Peng, Xiaoyu Liu (China)	701
Effects of mixed vegetation restoration modes on soil remediation at slope using wastewater Dong Meng, Qing Qin, Tianke Liu (China)	712
Exploring the household wastewater sorting intention of rural residents by PLS-SEM: an empirical study in Jiangsu Province, China Na Wang, Mingyu Yang, Hanqi Liu, Zhiqiang Li, Chenyu Wang, Xing Jin, Haoran Sun, Xiangfei Li (China)	725
Efficient rail-water intermodal transportation network using game theory Zhengbo Guo, Yongfu Jiang (China)	736
Prediction of calcium concentration in circulating seawater in a closed-cycle seawater cooling system using machine learning models Zhijie Li, Zhuoxiao Li, Lianqiang Zhang, Chong Chen, Mingming Hu, Xue Li, Kai Xu (China)	744
Leachate treatment by ceramic ultrafiltration membranes: fouling mechanisms identification M. Farah, F. Z. Addar, S. Kitanou, M. Belfaquir, M. Tahaikt, M. Taky, A. Elmidaoui (Morocco)	755
Managing water consumption per capita using performance indicators: a case study L.Q. Owais (Hungary), M.S.E.-A. Al-Waqfi (Jordan), J.T. Kiss (Hungary)	769
Experiences of desalination for agriculture in Spain: technology, economy and innovation P. Terrero, D. Zarzo (Spain)	779
Response surface methodological approach for optimizing nitrate removal by nanofiltration and reverse osmosis processes H. Elmrbet, S. Kitanou, F.Z. Addar, A. Moukhtari, M. Tahaikt, M. Taky, A. Elmidaoui (Morocco)	791
Author Index	802
